

Topic # (The BCS code of Conduct)

The development of professional bodies in computing:

⇒ The institute of Electrical and Electronic Engineers (IEEE) is a professional engineering society based in USA but with members and activities spread worldwide.

⇒ This was the IEEE-CS, it has over 100,000 members.

IEEE-CS was closely followed by the Association for Computing Machinery, universally known as ACM.

BCS

⇒ BCS stands for British computer society.

⇒ it is a professional body ^{or chartered institute} that represents people working in IT, computing, SE and CS.

⇒ Essentially, it is an organization that supports and promotes the 'IT industry'.

⇒ it was proposed in 1957.

⇒ it is learned society of ACM

⇒ In 1960, become highly professional, qualification awarding society.

Code of Conduct

- ⇒ Set of rules and regulations.
- ⇒ it is a list of guidelines and rules that explains how professionals should behave at work.
- ⇒ All professional bodies have a code of conduct that their members are required to be followed.
- ⇒ it is important characteristics of professional body.
- ⇒ Sometimes called code of ethics.
- ⇒ A code of conduct sets out the standards of behavior that members of the body are expected to be follow in their professional life.
- ⇒ Code of practice is different from Code of conduct.
- ⇒ When you member of professional conduct and obey rules called code of practice.
- ⇒ A code of conduct tells how to behave.
- ⇒ A code of practice tells how to do something.

BCS Code of Conduct:-

⇒ The BCS code of conduct is a comprehensive set of guidelines that IT professionals are expected to follow.

⇒ It is designed to ensure that the IT industry operates ethically and responsibly.

⇒ BCS code of conduct divided into four sections:

1. The public interest
2. Duty to relevant authorities
3. Duty to professions
4. Competency and integrity

1. The public interest:

⇒ Carry professional duties with due care and diligence. ^{بصبر، بجد، بصدق}

⇒ Protect environment

⇒ Prioritize the safety, health and well-being of the public when developing or using IT systems.

⇒ Strive for sustainable IT solutions.

⇒ Promote equal access to the benefit of IT and avoid creating digital divides.

2. Duty to relevant authorities:

⇒ The relevant authority means the person or organization that has authority over what you are doing.

⇒ it means you have a responsibility to cooperate with and follow the rules set by the organization that oversee your work.

ex: if someone work for a company, and his relevant authority is employer, then he has a duty to follow this rules, policies and procedures.

⇒ members of the BCS are expected to behave professionally towards the relevant authority in the following:

1. Don't pass on Confidential information without permission — Confidential info may be technical info about company products.
2. Avoid misrepresentation — e.g. claiming that a piece of software can do something it cannot.
3. Avoid conflicts of interest: means your personal interest don't get in the way of professional responsibilities.

3. Duty to profession:

⇒ uphold the reputation of the IT profession.

⇒ Contribute to the development of the IT profession through knowledge sharing and mentoring.

⇒ Encourage ethical behavior among colleagues.

ex: A doctor has a duty to their profession to stay up-to-date on medical advancements, treat patient with care and maintain patient confidentiality.

4. Competency and integrity:

⇒ maintain and continuously develop IT knowledge and skills.

⇒ follow appropriate codes of practice and other standards. Keep up-to-date ^{profession knowledge} relate this

⇒ Not claim to be competent in areas where they are not.

⇒ Act honestly and truthfully in all professional dealings.

⇒ Avoid conflicts of interest and disclose any potential conflicts

⇒ Be fair and impartial in work.

Note: The BCS code of conduct is a living document that may be updated to reflect changes in the industry or society.

How BCS promotes education?

⇒ The BCS promotes education in a number of ways:

- it runs its own system of professional examinations and grants approval to suitable organizations that provide courses to prepare students for them.
- it accredits degree programmes offered by institutions of higher education.
- it sets the syllabus for a range of vocational qualifications and accredits training organizations to provide the associated short courses.

Role and Characteristics of BCS:

1. Setting standards:

⇒ BCS establishes and maintains high standards of professional conduct and competence within the IT industry.

2. Accreditation / Promote education:

⇒ It accredits IT courses and qualification and educational provision to assist in achieving these standards.

3. Professional development:

⇒ Promotes and supports the continuing professional development of its members by providing a platform for continuous learning and development through conferences, workshops and publications.

4. Chartered status:

⇒ BCS is the only body in the UK that grants Chartered IT professional (CITP) status, recognizing the highest level of IT expertise.

5. Standards of professional conduct:

⇒ Defines standards of professional conduct and enforces these standards within its membership.

6. Advocacy:

⇒ It represents the interests of IT professionals, engaging with government and industry to influence policy and decision making.

7. Ethical guidance:

⇒ it promotes ethical and responsible use of IT, offering guidance and support to members.

8. Networking:

⇒ BCS fosters a strong community of IT professionals through networking events and online forums.

⇒ And actively supports the advancement of knowledge in the field of IT, engineering, through its publications and sponsorship of conferences.

9. Adviser to UK Govt:

⇒ Advises the UK Government on relevant legislation.

10. Strong reputation:

⇒ it is widely respected as a "leading authority" in the field of IT.

11. Global Reach:

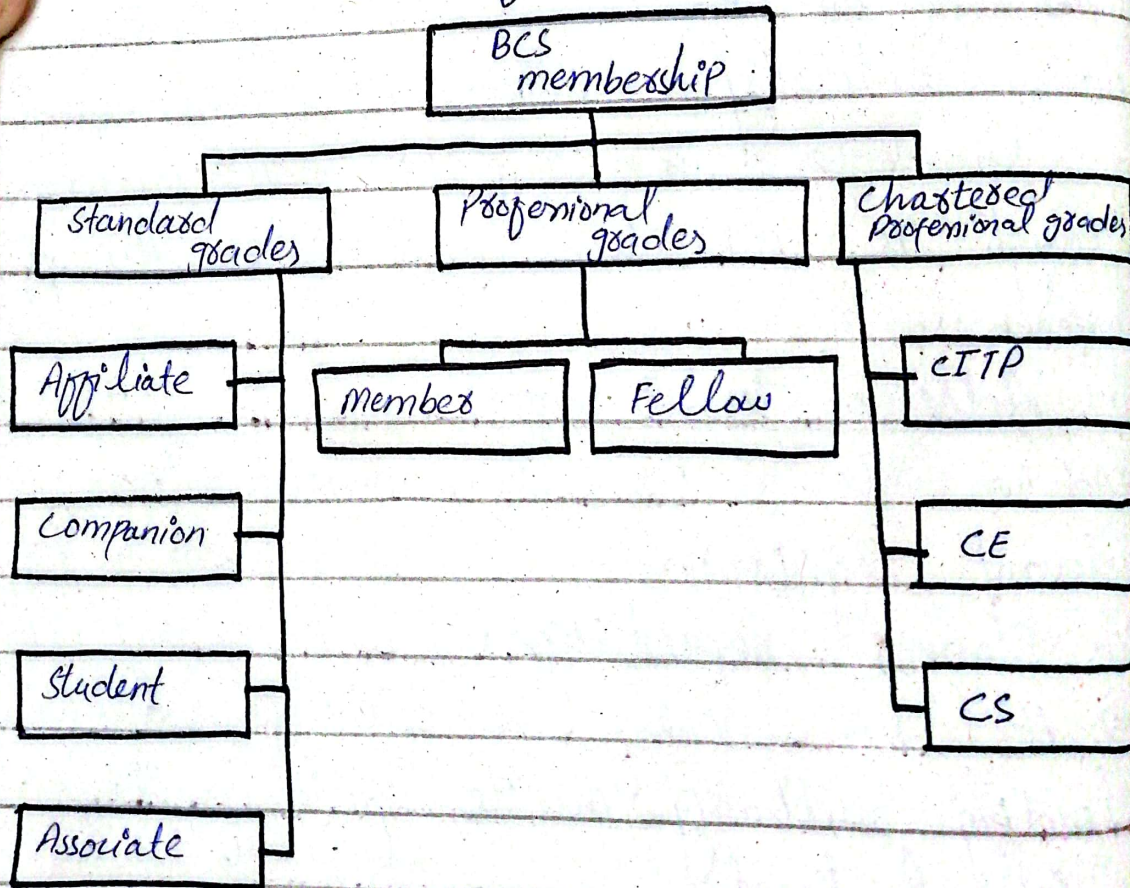

⇒ with members in over 100 countries, BCS has a significant global presence.

12. Diverse membership: it represents a wide range of IT professionals, from students to senior executives.

Membership Grades of BCS Professional Qualifications

⇒ The BCS has three major membership categories:

1. Standard grades
2. Professional grades
3. Chartered professional grades

1. Standard grades:

⇒ The standard grades are:

1. Affiliate
2. Companion
3. Student
4. Associate
