

Q. What is rating bar?

⇒ Android `RatingBar` can be used to get the rating from the user. The `Rating` returns a floating point number. it may be 2.0, 3.5, 4.0 etc.

⇒ `RatingBar` displays the rating is stars. `RatingBar` is a subclass of `AbsSeekBar` class.

⇒ The `getRating()` method of `RatingBar` class returns the rating number.

XML file

<Button

```
android:id="@+id/btn"
android:layout_width="wrap_content"
android:layout_height="wrap_content"
android:text="Submit"
```

>

RatingBar

```
android:id="@+id/ratingBar"
android:layout_width="wrap_content"
android:layout_height="wrap_content"
android:layout_marginLeft="72dp"
android:layout_marginTop="60dp"
```

Java file code:

```
public class MainActivity extends
AppCompatActivity
{
    RatingBar ratingBar;
    Button button;

    @Override
    protected void onCreate(Bundle savedInstanceState)
    {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        addListenerOnButton(click());
    }
}
```

```

public void addClickListenerOnButtonClick()
{
    RatingBar = (RatingBar) findViewById(R.id.
    RatingBar);
    button = (Button) findViewById(R.id.button);
    // perform action on button
    button.setOnClickListener(new View.OnClickListener() {
        @Override
        public void onClick(View v)
        // Getting the rating and displaying
        it on the toast.
        String rating = String.valueOf(RatingBar.
        getRating());

```

```

        Toast.makeText(getApplicationContext(), rating,
        Toast.LENGTH_LONG).show();
    }
}
}
}

```

Q. What is seekBar?

o SeekBar is a kind of ProgressBar with draggable thumb. The end user can drag the thumb left and right to move the progress of song, file download etc.

o The SeekBar.OnSeekBarChangeListener interface provides methods to perform even handling of seekbar.

o SeekBar and RatingBar classes are the sub classes of AbsSeekBar.

xml file

<SeekBar

```

android:id="@+id/seekBar"
android:layout_width="match_parent"
android:layout_height="wrap_content"
android:layout_marginEnd="8dp"
android:layout_marginStart="8dp"
android:layout_marginTop="172dp"

```

/>

Java file:

1. Create object

SeekBar seekBar;

2. find id

seekBar = (SeekBar) findViewById(R.id.seekBar);

seekBar.setOnSeekBarChangeListener(new SeekBar

OnSeekBarChangeListener() {

@Override

public void onProgressChanged

(SeekBar seekBar, int progress,

boolean fromUser) {

Toast.makeText(getApplicationContext(),

"SeekBar Progress: " + progress, Toast.LENGTH

SHORT).show();

}

@Override

public void onStartTrackingTouch (SeekBar

seekBar) {

Toast.makeText(getApplicationContext(), "SeekBar

touch started", Toast.LENGTH_SHORT).show();

}

@Override

public void

seekBar) {

onStopTrackingTouch (SeekBar

Toast.makeText

(getApplicationContext(),

"SeekBar touch

stopped", Toast.LENGTH

SHORT).show();

}

}

}

o ————— o

Q-What is Progress Bar?

⇒ Progress bar dialog box use to display the status of work being done e.g. downloading file, analyzing status of work.

⇒ ProgressDialog class is the subclass of AlertDialog class.

⇒ The ProgressDialog class provides methods to work on progress bar like setProgress(), setMax(), show() etc. The progress range of ProgressDialog is 0 to 1000.

XML file:-

<ProgressBar

android:id="@+id/ProgressBar"

android:layout_width="match-parent"

android:layout_height="wrap-content"

style="?android:attr/progressBarStyleHorizontal"

android:progressDrawable="@drawable/custom-progress-bar"

<Button

android:id="@+id/button-progress"

android:layout_width="wrap-content"

android:layout_height="wrap-content"

android:text="Start Progress"

android:textAllCaps="false" />

</LinearLayout>

custom-progress-bar.xml:- (drawable)

<layer-list xmlns:android="http://schemas.android.com/apk/res/android">

<item android:id="@android:id/background">

<shape android:shape="rectangle">

<corners android:radius="6dp">

<solid android:color="#D2EDFC" />

</shape>

</item>

<item android:id="@android:id/progress">

<scale android:scalewidth="100%">

<shape android:shape="rectangle">

<corners android:radius="6dp">

<solid android:color="#8080FF" />

</shape> </scale> </item>

Java file:

```
private int CurrentProgress = 0;  
private ProgressBar progressBar;  
private Button startProgress;
```

```
progressBar = findViewById(R.id.progressBar);  
startProgress = findViewById(R.id.startProgress);
```

```
startProgress.setOnClickListener(new View  
    .OnClickListener() {
```

```
    @Override
```

```
    public void onClick(View v)  
    {
```

```
        CurrentProgress = CurrentProgress + 10;  
        progressBar.setProgress(CurrentProgress);  
        progressBar.setMax(100);
```

```
    }
```

```
});
```

Create Circular ProgressBar.

(1) Create drawable file circle.xml

```
<layer-list
```

```
<item>
```

```
<shape
```

```
    android:shape="ring"
```

```
    android:thicknessRatio="16"
```

```
    android:useLevel="false">
```

```
<solid
```

```
    android:color="#DDD"/>
```

```
</shape>
```

```
</item>
```

```
<item>
```

```
<rotate>
```

```
<shape
```

```
    android:fromDegrees="270"
```

```
    android:toDegrees="270"
```

```
    android:shape="ring"
```

```
    android:thicknessRatio="16"
```

```
    android:useLevel="true">
```

```
<solid
```

```
    android:color="@color/colorAccent"
```

```
</solid>
```

```
</shape></rotate>
```

```
</item>
```

```
</layer-list>
```

main-activity.xml:
RelativeLayout

<ProgressBar

android:layout_width="200dp"

android:layout_height="200dp"

android:indeterminateOnly="false"

android:progressDrawable="@drawable/circle"

tools:progress="60"

android:id="@+id/progress_bar"/>

<TextView

android:layout_width="wrap_content"

android:layout_height="wrap_content"

android:id="@+id/text_view_progress"

tools:text="60%"

~~app:layout~~

android:textAppearance="@style/TextAppearance

AppCompat.Large"

<Button

android:id="@+id/button_dec"

android:layout_height="wrap_content"

android:layout_width="wrap_content"

android:text="-10%" />

<Button

android:id="@+id/button_inc"

android:layout_width="wrap_content"

android:layout_height="wrap_content"

android:text="+10%" />

<RelativeLayout>

Java file:

private void progress = 0 ?

button_inc.setOnClickListener {

if (progress <= 90) {

progress += 10

}

}

button_dec.setOnClickListener {

if (progress >= 10)

{

progress -= 10;
